

# Mega Memo Game rule

## Starting

Distribute all the small cards so each player has one card of each pair of cards. The players then spread out their cards on the table with the picture facing up. Place the stack of large cards with the puzzle facing up in the middle of the table.

## Playing

Turn over one large card. The players have to put together the picture on the large card as fast as they can.

You can also turn over the large card for a few seconds, to memorize the picture and then turn over again and trying to remake the large picture with their small cards.

The first player to finish calls out "Stop". The other player then checks whether the picture was put together correctly.

- If the picture was put together correctly, the player who finished first can take the large card and keep it.
- If the picture was put together incorrectly, the large card is returned to the bottom of the stock of large cards.

## Winning

The game continues until all large cards have been turned over. The player to collect most large cards wins the game!

You can use the back of the large cards also as a puzzle!
